

UCHICAGO MEDICINE

Please join us for an informative CME dinner presentation
Event is exclusively for WomanCare PC

This activity is approved for AMA PRA Category 1 Credit™

Ovarian Cancer: The Old and The New – Dr. Yamada
Gastrointestinal Peritoneal Metastases – Dr. Turaga

Learning Objectives:

1. Describe patient characteristics that make intraperitoneal chemotherapy an appropriate agent for ovarian cancer.
2. Identify options for regional therapies in both neoadjuvant and adjuvant settings.
3. Discuss current controversies in adjuvant therapies for ovarian cancer.
4. State the incidence of peritoneal metastases (PM) in the general population.
5. Analyze current therapeutic strategies for the management of PM.
6. Discuss future therapeutics and diagnostics for PM.

Tuesday, April 23, 2019
