5	Excellent course, well prepared! Very impressive presentations of Dr. Grogan. Very informative presentation of Dr. Sarne about BRAF mutation. Dr. Doherty thank you for considering input in ATA guidelines. Thinking the guidelines should be for all the communities and all the physicians. There are difficulties practicing in the community since not all the radiologists know how to do preop evaluation of thyroid cancer or proper seshemibi sums and not all the surgeons do total thyroidectomy with the result of 6 months post op thyroglobulin zero. Any way dazzling presentations overall great organization.	Jul 22, 2013 12:50 PM

11	As a student, much of this information was new to me. However, the presentations were extremely informative & easy to follow. This conference was extremely well-organized & presented. All of the speakers were well-versed and made very thoughtful points. The length of presentations & number of breaks was very appropriate ; the day flowed very well.	Jul 19, 2013 3:12 PM
12	Wonderful conference	Jul 19, 2013 3:06 PM
13	1. Very very good, wish it was more advertised so the fellows would attend. 2. Adding more pre-op imaging / testing for (illegible) for the (illegible) surgeons. - US thyroid vs US neck, preop o UPTH - some surgeons require all before surgery requested - much variations in surgeons. 3. Post op care amongst different auoecine surgeries -Some surgeons start post op really really high doses Co t, thyaoi humdres, (illegible), etc etc	Jul 19, 2013 3:01 PM
