9	Some of the slides in the syllabus were too small and difficult to read. Since the post test is to confirm that the viewer actually spent the appropriate time on the procedure/program the answers should not be difficult to obtain from the syllabus. Most of the areas clearly covered the questions in the talk. However, answers to the questions were not clearly covered. For example: I do not need mammography. While I found the discussions excellent and I appreciated the approach to the topic, I had difficulty answering a number of the related questions and couldn't find the answers in the material in the syllabus. 35	Overall very good. Nuclear Medicine speaker not very engaging. Several questions have no correct answer.	Sep 10, 2012 1:35 PM
