

Live from The University of Chicago:

The Chicago Saturday Slide Club

3rd Annual Series in Anatomic Pathology

Cytopathology: Diagnostic Challenges and Current Updates on Classification Systems in Cytology

Saturday, May 5th, 2018

SERIES DESCRIPTION

Join us at The University of Chicago for a Saturday series of dynamic learning and interactive microscopy sessions designed for practicing surgical pathologists and senior trainees. A two-year curriculum has been developed to address each subspecialty in anatomic pathology. The overall focus will be updates on existing entities, descriptions of new diagnoses, and pearls to avoid pitfalls. Through a guided microscopic tour, the May 2018 session will address cytologic features in different entities in a variety of organ systems and the current updates on classification systems in cytology. To make the discussions more meaningful, cases will be posted on our website prior to the session for preview. They will be presented by faculty and discussed with participants in an interactive manner. Participants are encouraged to bring their own challenging cases to share with the group. References will be provided after the event. Additionally, post-discussion questions will be administered for an opportunity to earn SAM credit. Continental breakfast, coffee, lunch, and parking are included in the registration fee of \$175 per session (\$35 for trainees). Space at the multiheaded microscope is limited to the first fifteen, so register online at <http://cme.uchicago.edu/SlideClubMay18> or <https://chicago-saturday-slide-club-cytopath.eventbrite.com> to reserve your seat!
