

5TH INTERNATIONAL WORKSHOP

ON BIOLOGY, PREVENTION AND TREATMENT OF
RELAPSE AFTER HEMATOPOIETIC STEM CELL TRANSPLANT

OCTOBER 7-9, 2021 • SHERATON NEW YORK TIMES SQUARE • 811 SEVENTH AVE, NEW YORK, NY

3 WAYS YOU'LL BENEFIT FROM ATTENDING

One-stop education and networking without the nonsense, here are three reasons you need to attend HSCT² :

- Learn about the novel mechanisms of relapse from experts like next gen synthetic biologist- Dr. Joseph Fraietta.
- Hear the latest in ongoing laboratory and translational research, like T cell exhaustion and checkpoint blockade
- Meet internationally recognized speakers from a diverse and multidisciplinary group. Listen live or walk up and introduce yourself — this is your chance to visit with expert scientists, translational scientists and clinical investigators doing the work that's most important to you.

Scan the [agenda](#) for the research names you recognize and save yourself a seat at this exclusive educational and networking event. Register now for the October 8-9, 2021, workshop.
