MAR 14 2020
Even with three years of fellowship training in gastroenterology, knowledge and self-efficacy in women's gastrointestinal (GI) and liver health issues remain inadequate in many fields, as shown in both research and personal experience. Most of the standard of care approaches to common GI and liver illnesses are implemented across both genders, despite specific issues that are different in women. In gastroenterology, nearly 60% of patients are women, and many disorders are more common in women. Adequate knowledge in GI women's health is critical to provide optimal treatment to women. Additionally, women remain underrepresented among GI providers, even though female patients prefer to seek treatment from female gastroenterologists, creating a gap in care.

GOALS

This activity will discuss the symptoms, diagnosis, and treatment of common gastrointestinal and liver diseases that afflict women more commonly and differently than men. This activity also aims to discuss strategic solutions to barriers that female GI providers face in their career development. It will result in improved care of female patients with GI illnesses and encourage the career development of women in the field of gastroenterology.

LEARNING OBJECTIVES

At the conclusion of this education activity, participants will be able to:

- Describe specific gastrointestinal and liver diseases that afflict women more commonly or in a different way than men;
- Identify the unique presentations and complications of specific gastrointestinal and liver diseases that afflict women more commonly or in a different way than men;
- Discuss gender-specific management strategies that address the needs of the women patients more appropriately;
- Recognize challenges that women gastroenterologists face in their career as they navigate this field dominated by men;
- Assess strategies to help overcome barriers in the career advancement of women gastroenterologists and promote their success.

OUTCOMES

The educational information presented in this activity will add to participants' knowledge about gastrointestinal diseases that afflict women more commonly and their ability to recognize and manage them in women. It will improve their competence and performance as they apply the knowledge in their own practices, thus translating into better patient outcomes.

The career development topics will help female GI providers navigate challenges faced in their career, whether in private practice or academia, to allow them to progress further and be successful in their chosen paths.

TARGET AUDIENCE

This activity is designed for physicians and other healthcare professionals interested in the treatment of women with gastrointestinal illnesses.
Course Directors

Sonia Kupfer, MD
Associate Professor of Medicine
Director, Gastrointestinal Cancer Risk and Prevention Clinic

Sonali Paul, MD, MS
Assistant Professor of Medicine

Anjana A. Pillai, MD
Associate Professor of Medicine

Vijaya Rao, MD
Assistant Professor of Medicine
Director, Student and Resident Rotations

Helen S. Te, MD
Professor of Medicine
Medical Director, Adult Liver Transplantation

NURSING CONTENT EXPERT
M. Ruth Mangonon-Barnes, MSN, APN, ACNS-BC, CPHQ
Clinical Nurse Specialist
Ambulatory Center for Nursing Professional Practice and Research

Invited Speaker

Amy S. Oxentenko, MD
Professor of Medicine
Division of Gastroenterology & Hepatology
Mayo Clinic, Rochester, MN

UChicago Speakers

Fay J. Hlubocky, PhD, MA
Clinical Health Psychologist Hematology/Oncology

Rene Lederman, PT
Orthopedic Clinical Specialist

Carol E. Semrad, MD
Professor of Medicine
Director, Small Bowel Disease & Nutrition

Uzma D. Siddiqui, MD
Associate Professor of Medicine
Associate Director, Center for Endoscopic Research and Therapeutics (CERT)
Director, EUS and Advanced Endoscopy Training Program

Elizabeth Wall, MS, RDN-AP, CNSC
Registered Dietitian IV, GI/Nutrition Support

DISCLOSURE DECLARATIONS

As a provider accredited by the ACCME, The University of Chicago Pritzker School of Medicine asks everyone who is in a position to control the content of an education activity to disclose all relevant financial relationships with any commercial interest. This includes any entity producing, marketing, re-selling, or distributing health care goods or services consumed by or used on patients. The ACCME defines “relevant financial relationships” as financial relationships in any amount occurring within the past 12 months, including financial relationships of a spouse or life partner that could create a conflict of interest. Mechanisms are in place to identify and resolve any potential conflict of interest prior to the start of the activity.

Additionally, The University of Chicago Pritzker School of Medicine requires authors to identify investigational products or off-label uses of products regulated by the US Food and Drug Administration, at first mention and where appropriate in the content.
CONFERENCE TOPICS

SATURDAY, MARCH 14, 2020

Useful Tricks of the Trade in Endoscopic Resection
Uzma Siddiqui, UCM

Superior Mesenteric Artery and Median Arcuate Ligament Syndromes: Unraveling the Mystery
Carol Semrad, UCM

New Frontiers in Colorectal Cancer Screening
Sonia Kupfer, MD

Diagnostic Approach to Abdominal Bloating in Women
Amy Oxentenko, Mayo

Navigating the Low FODMAP Diet
Elizabeth Wall, UCM

Restoring the Pelvic Floor Function
Rene Lederman, UCM

Alcoholic Hepatitis as an Indication for Liver Transplantation—A Debate
Sonali Paul & Anjana Pillai, UCM

Keynote Speech
Amy Oxentenko, Mayo

Reconnect & Recharge: Fostering Resilience with Mindful Practice
Fay Hlubocky, UCM
REGISTRATION INFORMATION

How To Register

ONLINE  https://cme.uchicago.edu/womenindd2020 (credit card payment only)

To pay by check, you must mail this registration form with payment to:

MAIL  The University of Chicago
