

Neurology Critical Care Certificate Course

Learn online with the University of Chicago

Who is this course for?

The course is especially oriented but not limited to neurocritical care doctors, neurosurgeons, neurointensivists, neurologists, emergentologists, internal medicine specialists, cardiologists and nurses who work in critical care sectors.

Learning Objectives

At the conclusion of the course, participants will be able to:

- Diagnose the most common acute neurological and neurosurgical pathologies;
- Generate a differential diagnosis suitable for neurocritical patients;
- Describe how to properly treat common acute neurological and neurosurgical diseases;
- Recognize how to use and properly prioritize limited resources for the treatment of these patients.

Format

This self-paced course opens Dec 2, 2019 with new registrations accepted until March 6, 2020. The course includes 42 Spanish language presentations, divided into 7 modules. The price for the course is \$1200.

This activity is approved for *AMA PRA Category 1 Credit*[™].

Learn in Spanish

This course is conducted entirely in Spanish. Join colleagues from all over Latin America and familiarize yourself with neurocritical care content in Spanish to improve communication and relationships with Spanish-speaking patients.
