MICROBIOME RESEARCH: WHERE DO I BEGIN?

A basic knowledge of the microbiome is crucial to clinical research. Join the University of Chicago's Microbiome Center leadership **Jack Gilbert, PhD**, and **John Alverdy, MD**, at the 1st Annual Microbiome Workshop, where you'll develop the tools to perform microbiome-related research, including sequencing, collecting patient specimens, performing analysis and more.

FOR CLINICIANS | RESEARCHERS | RESIDENTS & FELLOWS

MAY 23-25, 2017: Main Workshop

MAY 26, 2017: Optional Lab Day

**Marine Biological Laboratory
Woods Hole, Massachusetts**

Accreditation Statement

The University of Chicago Pritzker School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation

The University of Chicago Pritzker School of Medicine designates this live activity for a maximum of 12.5 *AMA PRA Category 1 Credits*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Nurses and other healthcare professionals will receive a Certificate of Participation. For information on the applicability and acceptance of Certificates of Participation for educational activities certified for *AMA PRA Category 1 Credit*[™] from organizations accredited by the ACCME, please consult your professional licensing board.

FACULTY COURSE CO-DIRECTORS:

JOHN ALVERDY, MD

Sara and Harold Lincoln Thompson
Professor of Surgery
Executive Vice Chair,
Department of Surgery

Dr. Alverdy is an expert in performing GI surgical procedures. He is also a leading clinical researcher on the molecular interactions of bacteria and the intestinal mucosa in order to understand how life-threatening infections arise after trauma and major surgery and during critical illness.

JACK GILBERT, PHD

Professor
Department of Ecology & Evolution
Department of Surgery
Faculty Director, The Microbiome
Center

Dr. Gilbert's research is focused on microbial ecology. He is developing unifying principles which govern how microbial communities assemble. He founded the Earth Microbiome Project, co-founded the American Gut Project, and is the editor-in-chief of the journal *mSystems*.
