

CHICAGO GYNONCOLOGY UPDATES

CME INFORMATION

PHYSICIAN CREDIT

The University of Chicago Pritzker School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The University of Chicago Pritzker School of Medicine designates this live activity for a maximum of **4.25 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

NURSING CREDIT

University of Chicago Medicine is approved as a provider of nursing continuing professional development by the Ohio Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. (OBN-001-91)

This live activity is designated for a maximum of **4.25** continuing nursing education units.

AMERICAN BOARD OF INTERNAL MEDICINE MOC PART II CREDIT

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to **4.25** MOC points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

OTHER HEALTHCARE PROFESSIONAL CREDIT

Other healthcare professionals will receive a Certificate of Participation. For information on the applicability and acceptance of Certificates of Participation for educational activities certified for *AMA PRA Category 1 Credit™* from organizations accredited by the ACCME, please consult your professional licensing board.

cme.uchicago.edu/GynOncUpdates2022

The all-virtual Chicago GYN Oncology Updates will celebrate the 2021-2022 theme of the SGO presidency of Dr. Diane Yamada, “Building Bridges and Breaking Barriers” by providing access to the most important educational and scientific updates for women’s healthcare professionals from the Society of Gynecologic Oncology (SGO) Annual Meeting on Women’s Cancer. It will include information and resources for members of the entire gynecologic cancer care team who provide treatment and care in the areas of chemotherapy, radiation therapy, and surgery. This highly interactive activity will provide participants with distillations of advances in the fields of ovarian cancer, endometrial cancer, and cervical cancer including options for treatment for women with ovarian cancer after progression on PARP inhibitors and appropriate use of new therapies such as antibody-drug conjugates and immunotherapy/antiangiogenic tyrosine kinase inhibitor combinations. Information on appropriate use and applications of genomic testing in GYN sarcomas will also be presented. The most recent updates on efforts to improve health equity will be presented. In addition, the critical importance of clinical research will be highlighted with presentations of Chicago area investigator-initiated trials (IIT) in order to foster ongoing collaborations.

TARGET AUDIENCE

This activity is designed for gynecologic oncologists, medical oncologists, radiation oncologists, pathologists, gynecologists, trainees, research scientists, nurses, nurse practitioners, physician assistants, and other healthcare professionals dedicated to the care of patients with gynecologic malignancies.

LEARNING OBJECTIVES

At the conclusion of this activity, participants will be able to:

1. Define the mechanisms of action and side effect profiles of new gynecologic cancer therapies;
2. Select treatment options for women with ovarian cancer who have progressed on PARP inhibitor therapy;
3. Discuss appropriate application of the category of “platinum-resistant” in the therapy of women with ovarian cancer;
4. Identify appropriate settings for use of antiangiogenic therapies in ovarian carcinomas;
5. Distinguish when to prescribe antiangiogenic/immunotherapy combination treatment appropriately for women with endometrial cancer;
6. Describe how to prevent and manage toxicities of antiangiogenic/immunotherapy treatment in women with endometrial cancer;
7. State how to order appropriate diagnostic testing for women with gynecologic sarcomas;
8. Recommend appropriate adjuvant therapy for women with gynecologic sarcomas;
9. Recognize how to address contextual barriers to health equity related to gynecologic cancer;
10. Discuss the potential application of ongoing gynecologic cancer research studies in the Chicago area.
