

The Future of Living Donor Kidney Transplantation: Evolving National Perspectives in Kidney Transplant Symposium

PRESENTING

Noted speakers include Oxford philosopher and ethicist

Janet Radcliffe Richards

Is Rewarding Living Kidney Donors Medically Unethical?

*and Nobel Laureate **Alvin Roth***

Shared Organ Programs

LEARNING OBJECTIVES:

At the conclusion of this event, participants will be able to understand:

1. The limits of the position that “rewarding donors is medically unethical.”
2. The induced failures of the altruistic system on organ procurement and allocation.
3. The impact of kidney shortage for transplantation, including preventable deaths and social and economic loss.
4. The types of actions that are immediately available to expand kidney donors.
5. The expansion limits of the deceased donor supply.
6. The U.S. population’s attitude towards rewarding organ donors.
7. The potential benefits for Government action to end the organ shortage including the benefits and costs to patients, society, and caregivers.
8. The beneficial impact of donor organ sharing.
9. The risk and safety of organ donation.
10. Donation is not easy or costless, but the emotional rewards are substantial.
