INFORMATION

THE MACLEAN CENTER

Enhance your ability to navigate complex ethical challenges in healthcare at this preeminent conference, designed for physicians, nurses, residents, students and healthcare professionals committed to improving patient outcomes through ethical decision-making. Engage with thought leaders through expert lectures, dynamic panel discussions, and collaborative sessions. This year's program offers an in-depth exploration of key ethical issues in clinical medicine, including informed consent, healthcare disparities, and the evolving dynamics of the patient-physician relationship.

Equip yourself with actionable strategies to address ethical dilemmas in your practice and elevate the standard of care you provide. **REGISTER TODAY: To guarantee your place at the conference, or to be a virtual attendee, please register as early as possible — visit cme.uchicago.edu/MacLean2024.**

TARGET AUDIENCE

This activity is designed for physicians, nurses, residents, students and other healthcare professionals interested in clinical medical ethics.

LEARNING OBJECTIVES

At the conclusion of this activity, participants will be able to:

- Identify the ethical situations or conflicts in routine clinical encounters;
- Consider the various perspectives, including legal, medical, and religious, needed to provide optimal patient care;
- Discuss how clinical medical ethics applies broadly to the American healthcare system and specifically to their fields or specialties;
- Discover how current literature and directives in clinical medical ethics will assist in improving medical decisions in patient care;
- Learn how to apply the tenets of clinical medical ethics to scenarios encountered in providing healthcare in the current environment.

CONFERENCE LOCATION

Griffin Museum of Science and Industry
5700 South Dusable Lake Shore Drive
Chicago, Illinois 60637

ABOUT THE CENTER

The MacLean Center for Clinical Medical Ethics at the University of Chicago was founded by Dr. Mark Siegler in 1984 through the generous support of Dorothy Jean MacLean, one of his longtime patients. Since its founding, the MacLean Center has focused on clinical medical ethics (CME). CME, a field largely started at the University of Chicago in 1972, addresses practical ethical issues such as truth telling, informed consent, surrogate decision making, and end of life care, that arise in routine, daily encounters among patients and all health care providers in health care institutions. However, CME also applies more broadly to the health policies and societal influences that impact how patients receive their health care. The MacLean Center sees the scope of CME to include advancing health equity by reducing disparities. We believe that this broad view of CME reflects the contemporary complex nature of how healthcare is provided. Since its founding, the MacLean Center has trained more than 650 clinical ethics fellows. Current and former MacLean Center fellows and faculty have published significant numbers of books and journal articles.
