On behalf of The University of Chicago, Digestive Diseases Center and Center for Continuing Medical Education, we are pleased to invite you to exhibit at the:

**University of Chicago Symposium on Acute and Chronic Pancreatitis** to be held January 25, 2025

**LIVE IN-PERSON** at the University of Chicago, Gleacher Center, 450 Cityfront Plaza Drive, Chicago, IL.

The **University of Chicago Symposium on Acute and Chronic Pancreatitis** will introduce participants to the multifaceted field of pancreatology, emphasizing the critical role of medical, interventional, and surgical therapies. It will broaden their understanding of pancreatitis, encompassing pathophysiology, fluid and nutrition strategies in acute pancreatitis, and the multidisciplinary approach essential for managing pancreatic complications and stratifying risk for pancreatic cancer. Engaging patient perspectives is also critically needed to better understand their priorities and foster a collaborative approach to pain management in pancreatitis. To highlight the importance of this engagement, the symposium will feature a panel including patients, caregivers, and experts in pain management, in which they will explore patient experiences with pain, well-being, and perceived barriers to pancreatitis care.

Through expert-led sessions and case studies, this activity will provide participants with the knowledge and skills necessary to address the diverse needs of individuals with pancreatitis. This includes proficiency in fluid strategies, nutritional support, endoscopic and surgical management of local complications, cancer risk assessment, and addressing long-term sequelae including severe pain, exocrine pancreatic insufficiency, and pancreatogenic diabetes. By fostering a deep understanding and breadth of knowledge in pancreatitis management, it will empower healthcare professionals to deliver optimal care.

The **Symposium on Acute and Chronic Pancreatitis** is a day-long educational activity with five program themes. The 2025 program will include sessions related to diagnostic evaluation for idiopathic pancreatitis, fluid and nutritional strategies in acute pancreatitis, endoscopic and surgical approaches to pancreatic necrosis and collections, therapies for intraductal stones, pancreatic enzyme replacement therapy, and multimodal approaches to pain management. By creating a symposium centered on pancreatitis diagnosis and treatments, this symposium will attract clinicians from various backgrounds, clinical interests, and aims to address evidence and clinical gaps related to medical and procedural therapies in pancreatitis.
